Seriously Hart.

Harrodsburg, Ky., Aug. 22.-Robert Lyon, of the wholesale and retail firm of Buchanan & Lyon, of Campbellsville, Ky., was seriously injured about the head and the automobile which he was driving was demolished here last night, when hit by a Southern railway train. Mr. Lyon was bringing two new automobiles over land from Detroit to Campbellsville. He was squarely in the middle of the track when hit. He was removed to a private residence, where his recovery is expected.-Harrodsburg, dispatch to Louisville Times.

All Columbia was sorry to hear of this accident, and trust that its seriousness will not keep Mr. Lyon from his business many days.

Long Time Ago.

In 1831-2 the gentleman who owned the residence, now the property of Miss Jennie Garnett, had a well put down, that is he started to sink a well, in the meadow, almost opposite where a bottling plant stood a few years ago. The drilling had progressed only about six feet when salt water was struck. The hole was plugged with a walnut pin, about 4 inches in diameter. and the dirt shoveled back into the hole. This occurrence was soon forgotten, but in 1865 one of our oldest citizens, John T. Barbee, referred to it, and as the oil excitement was running high here at that time, it was suggested that the plug should be found, and an investigation made. At fifteen or twenty hands with horses, plows and spades, and after plowing and spading for a week the plug was found, and upon pulling it out water in profusion commenced to pour out. It had a salty taste, and it was concluded that there was no oil deeper down, and the hole was again plugged, and the ground leveled.

Who knows but oil or a paying salt

Public Sale.

On Saturday, 31st day of August, 1918, I will offer to the highest and best bidder, at the Sam Ed Squires farm, about three miles west of Columbia, near Greensburg and Columbia road, the following property:

40 head of hogs, various sizes: 20 head of cattle, including three cows and calves; 5 head of horses and mules. 10 head of sheep. Also 50 bushels of wheat; 30 or 40 bushels of old corn, about 15 acres of new corn; about 4 acres of new tobacco, 10 thousand lbs of hay, 1 good man's saddle, one buggy and harness. This property will be sold on twelve month's time. This sale is brought about by my having to Will Ed Squires.

Sale to begin at 10 a. m., promptly. J. S. Breeding, Auctioneer.

Pardoned.

Rollin Stephens, who was convicted at the May term of the Adair circuit court, upon a seduction charge, and given three years in the penitentiary has been pardoned by Gov. Stanley. Mr. S. H. Mitchell went to Frankfort last week with the petition, signed by nine of the jurors to whom Stephens was tried before, and the Governor ordered his pardon, issued. Mr. Mitchell brought young Stephens home and he is now on his father's farm.

Eloped.

One day last week Ernest Thomas, son of Tandy Thomas, and Miss Martha Jones, daughter of Mr. and Mrs. W. H. Jones, of the Glensfork section, eloped to Tennessee where they were married. Upon their return all was forgiven and the couple are now at the home of the bride's parents.

Red Cross Sale.

We are authorized by the Columbia Red Cross Ladies that there will be old at auction on the square, Monday, Sept., 2nd, a very handsome quilt and other articles for the benetit of the National Red Cross fund.

Strayed.

A yearling Steer, black muley, left my place near Fairplay, about June 1st. Will pay for information in regard to same.

The Woman's Tonic Sold Everywhere

Church Membership in the **United States Shows Large** Increase in Ten Years

During the ten-year period ending December 31, 1916, the total church membership in the United States increased from 35,068,058 to 42,044,374, or 19.9 per cent; the number of churches from 212,230 to 228,007, or 7.4 per cent; the number of ministers from 164,830 to 191,722, or 16.3 per cent; the number of Sunday school scholars from 15,337,811 to 20,569,831, or 7.8 per cent, and the number of Sunday school officers and teachers from 1,746,074 to 2,049,293, or 17.4 per

These data, developed by the census bureau's recent inquiry relating to religious bodies, are contained in a statement compiled under the supervision of William C. Hunt, chief statistician for population.

The number of denominations covered was 201, an increase of 13 over the number reported for 1906. This increase is the net result of the consolidation or dropping out of 16 small denominations and the addition of 29 small denominations, comprising some in existence in 1906, but not then brought to light, and others resulting from consolidation of formerly independent churches.

Of the 42,044,374 church members reported, 15,742,262, or 37.4 per cent, were Roman Catholics; 250,340, or sixtenths of 1 per cent, were adherents of the eastern orthodox churches (mainly Greek and Russian), 359,998, or ninetenths of 1 per cent, were members of Jewish congregations.

The remainder, 25,691,774, or 61.1 per cent, comprised the membership of the various Protestant churches, together with that of a few bodies, such as the Latter Day Saints, the Spiritualists and others not usually considered as belonging to any of the groups

In comparing the figures given it should be borne in mind that the Roman Catholic and eastern orthodox churches include in their membership all children who have been baptized, whereas the Protestant churches do not, as a rule, receive young children as members, and that in the case of some of the more orthodox Jewish organizations only the male incorporators or those who have bought shares or memberships are treated as mem-

The foregoing percentages, therefore, overstate the relative strength of the Roman Catholic and eastern orof the Jews.

Mother's Cook Book

The surest road to health, say what they

Is never to suppose we shall be ill; Most of these evils we poor mortals know, From doctors and imagination grow.

Missouri Hoe Cake.

Put through a sieve two cupfuls of cornmeal, and a half a teaspoonful each of baking powder and salt. Add one tablespoonful of melted fat and stir in water to make a soft dough. Make into small cakes a half inch thick and bake on a hot greased griddle until well browned on both sides.

Barley Popovers.

Beat two eggs, one cupful of barley flour, one teaspoonful of sugar, half a teaspoonful of salt and one cupful of milk; use a Dover egg beater and beat until smooth. Bake about 40 minutes in a hot, well-greased iron pan. One-fourth of a cupful of rice flour may replace a half cupful of barley flour, improving the recipe

Cheese and Rice Souffle.

Put one and one-half cupfuls of American cheese through the food chopper, stir into it one and one-half cupfuls of white sauce, season highly with paprika, and when the cheese is melted add one and one-half cupfuls of cooked rice and the beaten yolks of three eggs. Fold in the whites of the eggs and turn into a well-greased baking dish, set in hot 3 water and bake half an hour in a moderate oven.

Liberty Ice Cream. Add one and one-half cupfuls of evaporated milk to one cupful of water and two cupfuls of milk, then scald. Add one cupful of honey and When cool add one cupful of crushed raspberries and a teaspoonful of lemon extract. Freeze as usual.

Can apples, apple juice and other fruit juice without sugar. In the winter the apple juice may be heated and sweetened, and it will be as good as if sweetened when put up. This takes no sugar now when it is scarce. A jar of fruit, perfectly sterile, will keep gun section. fully as well unsweetened.

Dry corn. This is difficult to keep when canned, but it dries easily and keeps its flavor. Cook five minutes, just long enough to set the milk. Cut and dry as quickly as possible.

Dampen the brush of the carpet sweper before using; it will then take up all lint with the dust.

Fastest Battle Cruiser.

The largest and fastest battle cruiser in the world is being built by the nited States. It will have 180,000horse power and a speed of 35 knots. courses in the United States.

Concrete Motor Boat Is Speedy

Prototype of the Newest of the Freight-Carrying Vessels Built to Defeat the U-Boats

A Close-Up of a Concrete Metor Boat, Which May Be the Coming Type of Pleasure Craft.

The stone age-in boats, at least-has returned to Washington. Floating easily on the waters of the Potomac there is today the first real stone boat the capital has ever seen. It is the Concrete, a prototype, as its name implies, of the newest of the freight-carrying vessels built to defeat the

This little motor boat, in its first trials there, more than proved the boasts of its builders as to its seaworthiness. The hull is only three-quarters of an inch thick, but, driven by a ten-horse-power engine, the Concrete developed good speed in several trips and drew favorable comment from several officials who rode in it.

Stars of Gold

Bands to be Worn on Arm by Those Who Have Lost Near Relatives in War.

War department officials who have relatives in the war recommended that the gold star of the navy, Fifteen-sixteenths of an inch in size, which may be purchased at any army or navy equipment store, be appliqued by hand on a band of broadcloth or other suitable material. The use of the regulation broadcloth is not obligatory, however, and the insignia may be made at home.

The band is to be of black, three inches wide, the stars, one for each member of the family lost, to be of gold, of gilded metal, satin, or of cloth, or may be embroidered in yellow silk or gold thread. The badge will not be patented and will not be commercial-

The badge was devised by the woman's committee of the Council of National Defense and approved by Presi-

War Strength of Company In U. S. Army Is 250 Men

The war strength of a company in the United States army is six officers and 250 men. The war strength of a regiment is 103 officers and 3,652 men, made up as follows: Twelve rifle companies, one headquarters and headquarters company, one supply company, one machine gun company, one medical detachment. A battalion consists of headquarters, four companies and machine

Drafted Men's Insurance.

A drafted man in the army is not compelled to take out insurance, but he is urged to do so. The minimum amount of insurance that can be taken is \$500, and the insurance ranges in multiples of \$500 up to \$10,000, which is the maximum. The insurance of a married man can be made payable to his father and mother, but the allotment of his pay must be made to his

Marked Variation in Yield Of Income and Profits for Different States This Year

Wide variation in the yield of income and excess profits taxes in different states this year, as compared with income tax payments last year, was shown by tabulations of the internal revenue bureau at Washington. Eight been consulted in regard to the black times as much revenue was received thodox churches and understate that band with gold stars to be worn on from these sources this year as last the left arm by those who have lost in the entire country, the comparative figures being \$2,821,000,000 and \$359,-000,000, yet the increases by states ranged from 2.6 times for Idaho, Utah and Montana to 15 times for Mississippi, Alabama and West Virginia. New York state ranked first in the volume of income and excess profits taxes returned this year, yet the increase over last year's yield was only 51-3 times.

Tax officials, it is said, have found it impossible to draw definite conclusions concerning tax evasions from the tab-

Increases by other states were as follows:

South Carolina, 132-3 times: Kentucky, 13; Arkansas and Oregon, 12 each; Illinois, Ohio, North Carolina and Pennsylvania, 11 each; Louisiana, 101/2; Nebraska, Tennessee and Wisconsin, 10 each; Maine, Vermont and New Hampshire (jointly), 9.7; Georgia, Kansas and Minnesota, 9 each; Virginia, 8.8; Missouri, 81/2; Washington, 8.4; Wyoming, Colorado and Indiana, 81-3; Massachusetts, 81-5; Connecticut and Rhode Island (jointly), Iowa and North and South Dakota, 8; California, 71/2; Florida, 71-3; Michigan, 7; New Jersey, 62-3; Delaware, Maryland and District of Columbit (jointly) and New Mexico and Arizona (jointly), 61/2 each; Texas, 41/2; Oklahoma, 2.7.

How to Distinguish Branch Of Service by Colors Worn

The branch of service to which soldiers belong may be told by their hat cords. The key to the military color

scheme follows: Blue-Infantry. Red-Artillery.

Yellow-Cavalry. Red and white-Engineering corps. Pink and white-Signal corps.

Blue with red tassels-Machine gun Green-Service corps. Orange-Quartermaster's corps. Plum and black-Medical corps. Dark red and black-Ordnance corps.

White band without cord-Aviation training corps. Blue and white-Reserve militia and

volunteer training corps. Regular army men are to be distinguished by the plain U.S. on their collars, while members of the National Guard have a small N. G. after the U. S., and members of the National army a small N. A.

Some Speed.

A rifle bullet covers about two miles in ave seconds, while sound travels the same distance in a shade more than nine and one-half seconds, so it is easy to understand why the bullet. strikes before the report of the rifle is heard.

Seiners Make Rich Haul.

It is said that a boat with five fishermen went out seining from Orrs island, Maine, for herring recently and sharing \$100 each.

Home-Made Iceless Refrigerators

Food Can Be Kept Cool in This Inexpensive and Easily Constructed Convenience

Where ice is not obtainable an iceless refrigerator, homemade, will be a useful food keeper and food saver. Maintaining a low temperature through ally fatal when skilled assistance is the evaporation of water from its canvas cover, according to the United States department of agriculture, the iceless refrigerator will keep meats, fruits and vegetables cool and will extend the period for keeping milk and been sent into the front line trenches butter. It can also serve as a cooler for drinking water. This is the way to in France to study this strange enemy

A wooden frame is made with dimensions 42 by 16 by 14 inches and covered with screen wire, preferably the rustless type, which costs little more than the ordinary kind. The door is made to fit closely, and is mounted on brass hinges, and can be fastened with a wooden latch. The bottom is fitted selid, but the top should be covered with screen wire. Adjustable shelves can be made of solid wood or strips, or sheets of galvanized metal. Shelves made of poultry netting on light wooden frames, as shown in the illustration, are probably the most desirable. These shelves rest on side braces placed at desired intervals. A bread-baking pan, 14 by 16 inches, is placed on the top and the frame rests in a 17 by 18 inch pan.

All the woodwork, the shelves and the pans should receive two coats of the veins by certain wounds and these white paint and one or two coats of white enamel. This makes a very attrac-

Two Views of Homemade Iceless Refrigerator. View on Left Shows Frame. View on Right Shows Complete Refrigerator.

tive surface and one that can be easily kept clean. The screen wire also may receive the coats of enamel, which will prevent it from rusting.

A cover of canton flannel, burlap, or duck is made to fit the frame. Put the smooth side out if canton flannel is used. It will require about three yards of material. This cover is buttoned around the top of the frame and own the side on which the door is not hinged, using buggy hooks and eye or large-headed tacks and eyelets worked in the material. On the front side arrange the hooks on the top of the door instead of on the frame and also fasten the cover down the latch side of the door, allowing a wide hem of the material to envelop the place where the door closes. The door can then be opened without unbuttoning the cover. The bottom of the cover should extend down into the lower pan. Four double strips, which taper to eight or ten inches in width, are sewed to the upper part of the cover. These strips form wicks that dip over into the upper pan.

The dimensions given make a refrigerator of very convenient size for household use and one with efficient evaporating surface, but it is not necessary to follow strictly these dimensions. If a larger capacity is desired, the height of the refrigerator can be increased.

In homes where large quantities of milk and butter are to be kept it would be well to have one refrigerator for milk and butter and another for other foods, as milk and butter easily absorb odors from other foods. It costs very little to build the refrigerator and nothing to operate it. The operation is as simple as the construction. The upper pan should be kept filled with water. The water is drawn by capillary attraction through the wicks and saturates the cover. As evaporation takes place, heat is taken from the inside of the refrigerator, thereby lowering the temperature of the inside and the contents. Capillary action starts more readily if the cover is first dampened by dipping it in water or throwing water upon it. The greater the rate of evaporation the lower the temperature which can be assured; therefore the refrigerator works best when rapid evaporation takes place.

When the refrigerator is placed in a shady place in a strong breeze and the air is warm and dry, evaporation takes place continuously and rapidly and the temperature inside the refrigerator is reduced. Under ideal conditions the temperature has been known to be reduced to 50 degrees Fahr. When it is damp and the air is full of moisture, the refrigerator will not work as well, since there is not enough evaporation. More water will find its way to the lower pan, but it will be drawn up into the covering by capillary attrac-

tion when the air again becomes drier. The refrigerator should be regularly cleaned and sunned. If the framework, shelves and paps are white enameled they can be more easily kept in a sanitary condition. It is well to have two covers, so that a fresh one can be used each week and the soiled one washed and sunned.

Traumatic Shock, Harvard Medical Expert Finds Far Most Deadly in Trenches

Men rarely die of shell shock but they have been dying at the rate of 20,000 a year in the English and Mannsville, Ky. French armies alone as a result of a far more deadly form of shock-traumatic shock, says the Atlantic Monthly. In fact, the latter is usunot at hand. Dr. William T. Porter Dear mother:of the Harvard medical school has in action. Traumatic shock, he found, usually follows a serious fracture of a major bone like the hip bone or Well, mother, I am in the front multiple wounds through the sub-cutaneous fat layer.

By experimenting with injecting olive oil into the veins of a cat Dr. Porter developed symptoms identical not so bad as you hear it is. with those appearing in cases of traumatic shock, confirming his belief that fatty globules are released into liked the thought of war, but I gradually clog up the hairlike capillaries of the brain until circulation hard and carrying some heavy ceases. Then began an interesting series of experiments in the front line trenches in which Dr. Porter tried the that if ever I got a chance at a experiment of giving carbon dioxide to freshly wounded men to prevent German, I would make him pay shock. The poilus were delighted for this hard work, and I feel with his tests and crowded around eagerly to watch the operation.

All of these details, together with the first one in Co., H. and the with the scalpel."

Keeping Books Aids Farmer in Ascertaining What Part

(By the United States Department

Agriculture.) How many people know just what it costs them to live? Such information is extremely valuable, especially ville, that I have made one shot if the makeup of the cost is known, both as to money cost and the other on the firing line and got me one. factors. To the farmer such data should prove valuable, indeed, especially in determining what part of his first one out of twenty-five or living comes from the farm.

If the accounts have been completely kept, the household expenses are So don't worry about me, I will ly assembled from the cash re ord, inventory and record of supplies used. Nothing in the realm of figures Has Hascal or Charlie gone to is more likely to astonish the average farm family than a summary of the household costs. The farm furnishes from you or Hascal or anyone the family a house to live in, milk, butter, cream, eggs, pork, fowls, fuel, vegetables and fruit, and often a great many other things. Yet the farmer often does not think of all these un- the place where I am. It snowless they are set before him. WAR NEWS.

Paris, Aug. 22.-The allied armies have taken more than 100,-000 prisoners since July 18, says Marcel Hutin in the Echo de Paris.

Paris, Aug. 22.-The allies have damaged six German armies since July 15, and the British are now eating into the seventh, with the spread of the battle northward and over front of seventy miles. Whether the enemy is prepared or unprepared, allied efforts have had the same results and the Germans have been cout-generaled and outfought. The armies attacked and damaged in the past six weeks have been those of Generals von Elnem, von Mudra, von and von Der Marwitz.

Foch are known only to himself Office today. and perhaps one or two others. but it is believed generally that his aim is not, as the Germans claim, to pierce their line, but to French, who have reached the strike a succession of blows to Divette river, the statement cluse the enemy irreplaceable losses in men and material, and to force him to make more or less disastrous retreats. If that be the Marshal's plan he is pursuing it with skill and unvaring Buccsss.

General Ludendorff is being forced to expend his effectives out of all proportion to his resources on a given sector of the front, after which another blow is struck home on another sector.

At no place have the Germans apparently been strong enough to check the attack entirely.

Wednesday the German resistance was most desperate on the right of General Mangin's army in the neighborhood of Bleuxy. If the French are able to reach the neighboring village of Juvigny, the salient marked by the villiages of Juvigny, Osly and Pasly would become untenable for General von Eben. who would be obliged to retreat beyond the Soissons-Coucy-Le-Chateau road. The German situation there is unenviable enough at present, but would become still worse as They are piling up prisoners and the French progressed. The guns.

Dames.

Military observers who are of end their defense by falling back line. to the old Hindenburg line all along the front at no very distant date. While that may be of the war. so, the enemy shows no signs at present of doing so voluntarily, and is fighting stubbornly and skillfully, yielding only when outmaneuvered and outfought.

GERMANS IN BAD PLIGHT.

Germans been so serious as at present, which augurs well for fighting. the future, says L'Homme Libre, in discussing the results of Wednesday's fighting.

The Germans have been deprived of all hopes of making a last- the hands of the British. ing stand on their present, front, and the allied offensive is costing man divisions have been identithem dearly. the Figurao says. fied. The battle is no longer a German battle, declares Le Matin, but the battle of Marshal Foch, to whose will all events appear to be subject.

The occupation of Lassigny by the army of General Humbert, newspaper commentators believe, will facilitate the capture one-half of a crop of this weed. of Noyon, toward which the armies of Generals Mangin and Humbert are pressing steadily, Lassigny was one of the pivots of the German defense system between the Oise and the Somme, and was defended most stubbornly.

Observers here see a new danger for the enemy in the British attack north of the Ancre in the direction of Bapaume. The British already are on the battleground of 1916,

Paris, Aug. 22. -- German troops were forced back over a twentymile front to a depth of from one to two miles from Lassigno to Boehn, von Eben, von Hutler the Aflette river during the night, according to the official The full designs of Marshal statement issued at the War

A Trip to Texas.

Gradyville, Aug. 21st, '18.

Editor News:-If you will allow me a little space in the paper, I will give its many readers a little sketch many sights I saw in that sec-3 p. m., we were on board the Star State. Changed cars at Lebanon and at Lebanon Junction, and the next morning, Friday, at 7:30 a. m., we were in Memphis, Tenn., a city of 146,-113 population, and at 8:15 we were on board a through train for Texas, via Pine Bluff, Ark. next city of any note was Tyler, and the next city was Corsicana, sicana, a distance of 70 miles, the crops were fine and cotton was waist high, the best I saw in Texas. Corn was good and peaches, oh my, the finest ones I have ever seen. There was plenty of them on the train afterritory, and the first porter, ing them, I just bought a market basket full and then took my seat by the side of my old gal and I was so busy I didn't

see any more Texas soil until I

heard the bell ringing and the

porter calling Waco, change cars

for McGregor, and in less time

than I can tell it, we were out

and had arms around our loved

ones, dear brother, his wife and

son, who were there in his Over-

land, to take us to their home, After a short rest we boarded his car and drove through the city, one of the nicest cities in Texas. Has a population of 45,270. We went through Camp McArthur, where there are 60,000 soldiers in training. We went from this camp to the Aviation field where we could see hundreds of airplanes. This was a grand sight to see men flying in every direction. It made me feel like I wanted to get in one and go over to Berlin and drop a bomb on the Kaiser. After viewing the camps, we started for McGregor and made the trip, 20 miles, in 30 minutes. When we arrived at our destination, it wasn't long till our friends from old Kentucky, who lived in the adjoining community began to arrive to question about the old Kentucky home and their people. The first ones to arrive, were Joe Yates and family, Frank Wheeler and family, Jas. Hoy and family, Will Sharp and family, Bob Yates and family, Cyrus Keltner and family, Topper Moore and many others. We were constantly going from place to place. Our first trip was to San Antonia, via automobile. My brother, his wife and son.

the many interesting places we saw on our way there and back. Good luck was ours, for not one bit of car trouble did we have. The roads were fine, for we made the trip, which was 227 miles in one day, stopping off at | ADAIR COUNTY NEWS \$1.50

many places of interest, namely, Braunsfel

When we arrived in the beautiful city of San Antonio, we drove first to Camp Travis, where James Grady was staof my trip to Texas, and the tioned. The camp was a place of interest, on account of the and water for years, cheer up! If tion of country. On July the many boys who were there and 11th my wife and I motored to too, their method of drilling and working.

train on our way to the Lone ley, the officers' training camp, where we found Sergeant Garland Grady. This camp is superior to most other camps on account of the beautiful shade. Although water was difficult. for there were only two drinks allowed to each person in one day, and there were 5,000 cavalwould spend in terrible vomiting spells From Pine Bluff to Texarkana, a ry horses and they had to be tabeautiful little city on the Ar- ken 7 miles to get water every kansas and Texas line, with a day. The first night of our stay population of 17,835 and the in the city, we gathered at one of the boarding places, and here I met Sergeant Grady's wife, formerly Miss Myrtle Butler, and Alta Grady's husband, Jack Cavitt. Then we visited the Alamo, where the decisive battle and the Mexicans. The place was wonderful to view, and the old picturesque walls were interesting to examine.

The many magnificent parks

of our trip and what I had seen.

Water is hauled for miles, for every well is dry. Cattle and stock are suffering for lack of water. After 2 weeks' stay at McGregor, we started to Memphis, Texas, to visit my wife's brother and sister. Went via Ft. Worth, 351 miles from Mc-Gregor to Memphis. Cotton and corn is almost a total failure all the way. When we arrived at Memphis, my wife's sister and brother were there waiting for us. We went in the waiting room for a short rest and when we left there, my wife left her purse and some money and about \$44 worth of jewelry, on the seat and did not miss it until we arrived at her sisters, 4 miles, and when I went back to look for it some one had swiped it, so I reported to the R. R. agent and he wired for a detective and 2 days later, I was notified that the purse and all its contents had been found after our stay of a day at Memphis. we started for our old Kentucky The trip was inexplicable, for home. PUBLICSALE

As administrator of the estate of Mrs. Ann J. Bricken, deceased, I will offer at public auction, on the farm that is known as the home place and fronting on the Springfield and Lebanon turnpike, about 31 miles from Lebanon and 53 miles from Springfield, on

Tuesday, Sept. 3

Beginning at 10:30 a. m.

Farm of 286 Acres

The farm contains by a recent survey 286 acres and 32 poles. It will be offered separately in two tracts and then as a whole, and sold in the manner it brings the most money.

Tract No. 1 contains 123 acres and 12 square poles. It has on it a house of 5 rooms, two good tobacco barns that have held 12,000 pounds of tobacco or more, and a small stock barn. A pond that has not been dry for several years, a well and springs. This farm is all cleared land. Has on it a locust grove that will make 800 or a 1,000 posts, and good fencing.

Tract No. 2 contains 163 acres and 20 square poles of good land. This tract has no buildings on it. Has about 50 acres of woodland with some valuable oak and other timber, and when cleared will grow excellent burley tobacco.

The whole of 286 acres is in a good state of cultivation and is a fine stock farm. The land is strong limestone, is fertile and well adapted to blue grass.

Farm of 170 Acres

Another farm belonging to the estate, containing about 170 acres, near the above land but not adjoining, will be offered at the same time and place, This tract is about 3 miles from Lebanon, and about 300 yards from the Lebanon and Springfield pike. No ground on this farm has been cultivated for several years, except 7 acres for tobacco last spring. All the rest of the farm is in grass. It has on it a good barn about 39 feet square, a good pond and two wells.

Terms will be reasonable and will be made known on day of sale.

I will be pleased to show these farms to any prospective buyer.

"Birds of a Feather"

'If you won't fight I will' said the Crown Prince to His Father.

A REAL BLOOD BOILER.

If you haven't yet found out why America entered the War and want this information; if you want your hair to stand on end at the atrocious Come early and hear some good crimes of the Huns; if you want to know why 100,-000,000 red blooded Americans are united in the Mrs. B. O. Hurt has been on common fight against autocracy; if you want to know much of the inside "dope" on the Prussian deviltry and diplomatic cunning; if you want to know these things, which are facts, pure and simple-then you had better see the great film version of JAMES W. GERARD'S famous expose, "MY FOUR YEARS IN GERMANY," which will be shown September 11th., at PARAMOUNT THEATRE.

This picture will make your blood boil; it will Miss Echol Calhoun who is fill you with righteous indignation. It will make you thing of the part that you should be playing in in the big SCRAP, it will put the characteristic American "fight" in a fellow--well it puts so much Mr. A. W. Popplewell and into a man who sees it that it can't be described.

> The feelings must be experienced before they can be appreciated. It's the solemn duty of every American in ADAIR COUNTY to see this truly remarkable Picture SEPTEMBER 11th, 1918, at PARA-MOUNT THEATRE.

Finds Million Are Consumptive

National Tuberculosis Association Asks for Plans for Cheaper Hospital Buildings

Need for increase of hospital facilities to accommodate tuberculous persons, said to number more than a million in the United States, is asserted in a statement issued by the National Tuberculosis association. The statement says in part:

"It was recently reported that the capital issues committee would probably not approve anything except the most inexpensive temporary structures. The association feared it might mean the holding up for the duration of the war of any increase in hospital accommodations.

"Something more than a million persons are now suffering from this disease in the United States, and the previous shortage in accommodations has been rendered more acute by the problem of providing proper care for men rejected in the draft.

"We have gone into the question with the capital issues committee and find that the attitude of its members is one of open-mindedness. The committee does not pass upon building projects which do not require the issuance of bonds, or those which can be covered by capital issues not exceeding \$100,000. Permanent structures may be approved if the difference in cost is not too large.

"Plans and estimates as to the most economical types of permanent buildings and of practicable temporary structures have been requested, to submit to the capital issues committee.

Jim Vaughn Has a Varied Assortment of Curves and Is Puzzling Hard Hitters

"Is Vaughn as great a pitcher as Alexander?" Bill Killefer, who ought to know a great deal about it, says "Yes." Bill was the battery mate of Alex the Great. He also has officiated behind the plate donning the mask and spangles when Hippo is on the hill.

Batsmen would rather see almost anyone on the firing line than Vaughn.

The brawny southpaw of Mitchell's staff has averaged about five strikeouts a game this season. "Alexander is a wonderful pitcher," said Killefer recently. "So is Vaughn. I've handled them both and, take it from me, there's little to choose between the pair. Vaughn is the equal of Alexander, all things considered, but their styles are different. Alex is a side-arm pitcher. Vaughn has a varied assortment of curves and he has a great hook that is puzzling to batsmen."

Bones of Napoleon's Heroes Paid Homage by French Poilus

An interesting ceremony was held recently at Rivoli, in the province of Verona, Italy. There, on January 14, 1797, Bonaparte won a great victory largely through the skillful use of his artillery. So it was only natural that in 1918 the French expeditionary force in Italy should choose the battlefield of Rivoli for its artillery training school. When the ground was being prepared for this purpose the bones of eight soldiers of Bonaparte's army were discovered and identified by their buttons as grenadiers of the guard. Their remains were solemnly interred at the foot of the monument of the battle of Rivoli, a detachment of French poilus rendering the last homage to their predecessors of 121 years

lean ham and a clove of garlic. Fry Selection of the Stars in the Flag of United States

Whatever conclusions may be reached as to the originator of the idea of selecting stars to represent the states of the federal union, one thing is certain; and that is that the stars which adorn the American flag were never borrowed from the coat of arms of any American citizen, not excepting that of George Washington. In the first place, General Washington who, as some authorities think, owned the stars selected for the purpose, was far from being the "father of his country" in the early in halves of oranges or of grapefruit. part of 1777, when the Star-Spangled Banner came into being. Signs Forbidding Peasants From Taking Potatoes, Plan To Induce Eating of Tubers

Although potatoes were early introduced into Europe by the Spaniards, they did not come in quantity for many years. The English found them in Virginia, but it is believed that the Spaniards brought them to that colony from further south.

The first attempt to introduce them into France was due to a well-known scientific authority named Parmentier. This was in the seventeenth century, says Popular Science Monthly. He imported some of the plants, set them out in a field near Paris, and by means of learned pamphlets and talk with the people tried to have the new vegetable brought into cultivation and the mar-

But it was all in vain. Potatoes did not prove attractive, and when the planted ones matured it seemed that they would rot in the ground on account of the prejudice against them.

Then some wise man who knew human nature—a student of psychology, with practical ideas-suggested that peasants could not be made to try potatoes by persuasion, but might be led to adopt them if they were forbidden to eat them.

His idea was adopted. Many signs were painted and erected in plain sight, forbidding under severe penalties anyone from taking any potatoes from

the field. the hills, and before long most of the

ripe tubers were stolen and eaten with

relish.

Automatic Soldier Made Of Steel Shoots 400 Shots In Any Desired Direction

"An automatic soldier" is one of the latest developments in weapons of war. A Danish engineer has recently taken out a patent for an apparatus to which he has given this name. It consists of a steel cylinder normally within a larger cylinder, the whole being sunk into the ground vertically. By means of a mechanism operated by wireless, the inner cylinder rises to a height of 18 inches from the ground and simultaneously an automatic rifle mounted on the inner cylinders fires 400 shots in any given direction.

The "automatic soldiers" can be controlled from a central position some four or five miles behind the line of Louisville, defense, according to the inventor. They may be seen by the enemy only when they rise from the ground.

From trials already made it has been shown, so it is reported, that a few hundreds of these steel soldiers can easily defend a position against infantry attacks, however numerous the opposing force may be. They blaze away their 400 shots without flinching, and never retreat. In order to overcome the "automatics" they must be destroyed one

SKETCHES OF ADJAIR COUNTY.

Historical and Biographical that Will be of Interest to all Readers of the News.

BY JUDGE H. C. BAKER.

No. 30.

In November, 1892, the Columbia Milling Company was organized, its incorporators, Geo. J. Reed, W. B. Rowe, Z. M. Staples, W. W. Bradshaw, and W. W. Jones. The stock was subscribed by a number of the citizens of Columbia, and the building near the bridge, this side of Russell Creek, was erected. George Nell was the manager. After a few years the stock fell into private hands, and the business is now owned and contrelled by a private company.

The organization of this Milling Company was the beginning of the improvement which has come to Columbia in the addition to the town along Russell Creek, consisting of dwellings, mills electric plant, etc., and, although it brought in individdent to its promoters it has added greatly to the growth and prosperity of the town, illustratterprise may lead to others.

The introduction of commercial fertilizer, sometime after the close of the civil war, worked quite an improvement in our farming interest and methods. Its use was very gradual, and at 1887. When the bills were footfirst in very limited quantities. Dr. Samuel B. Field is entitled ed, including contract price, into the credit of its introduction, and it came about in this way. He was at the time tobacco weigher at Louisville. At the time an office authorized by law, and I was editing the Spectator, at Columbia. He wrote me that his friends, Wm. Skeene & Co., were manutacturing a fertilizersuperphosphate, bone meal, &c., and they wished to introduce it in the county, and asked me if I would insert an advertisement in the paper, and take my pay in the fertilizer. Having space to spare, as was usual with the paper at that time, I agreed to do so, and several sacks of their products were shipped to me. Personally I had no use for it, as I had nothing but a garden, and I did not know what effect it might have on the soil or vegetables-thought possibly might taint or poision the whole outfit, so, I requested the farmers to come in and get small quantities and try it in a few hills of corn, tobacco, and other crops. They did this, taking it away in paper sacks, oyster cans &c. No one cared to venture more than a gailon on a field, and very few that much. They were willing to try a few hills, but they did not care to risk too

The experiments resulted favorably. The doctored hills outgrew the others, were healthier and more vigorous, and it was but a little while until the farmer who had commenced with a pint was using a ton.

It was along about this time when the first Jersey cows were brought into the county, and a little earlier the first male of that family. He was placed in charge of Matthew Taylor, an enterprising citizen of the Glenville neighborhood. This animal met an ignominious death at the hands of some disaffected persons in that locality who were

dead with his head under a rail fence well weighed down. An effort at one time was made to introduce the barbed wire fence in the county, but it met with as little favor as the animal named above. There has been a prejudice to its use except in a modified form. This may be due in part to a remark made by Wm. Stewart, Esq., upon his inspection of the first one built in the

After giving it a critical examination, he said; "Well, it may keep the stock inside from % getting out, and the stock outside from getting in, but my judgment is that the wires can never be put close enough together to keep the man out of h --- who would build such a

Following this the man took the fence down, and no one has used it since except as a top wire, or in connection with woven wire or plank. Possibly Stewart's remarks may be regarded as prophetic.

The contract to build the present courthouse in Columbia was let at the July term of court, 1884. The contractors were Win. H. Hudson, of Columbia, and Columbus Stone, of Burkesville, ing how the starting of one en- Ky. The contract price was \$17,-486. John Eubank, James G. Conover, and W. U. Chelf, composed the building committee, The house was accepted by an order made at the May term, ed up at the close, they amount. cidentals, etc., to the sum of \$31,230 37. The clock, which was not included in the contract, cost several hundred dollars. A change in the location, after quite an amount of work had been done on the foundation, entailed a loss of several hundred dollars. The house is a handsome building, well constructed, and convenient and comfortable in its arrangement.

> Judge A. E. Sallee was county court Judge when it was built. He served in that positions for twenty years, and had he lived, it is probable he would have continued in the position for an indefinitely longer time, as he had ways that made him very popular with the masses. Although he was not an old man when he died, he was familiarly known as "Old Jack," a name which was given him by some of his comrades of the town. The name stuck to him to his death. He was never married.

Pickwick did not have a more benevolent countenance, nor a warmer heart than Judge Sallee, and, with it all, he was not without a sense of humor. While he never married himself, he occasionally tied the knot for others. In the discharge of his official duties, and in doing so imposed obligations that were very specific and strict on the contracting parties. On one occasion, it was in substance as follows:

"Well, John, you and Betsey wish to get married, do you? Hold up your hands and be sworn. John, do you love Betsey? Do you promise to be good to Betsey, and to take good care her supplied with a plenty of undoing what had already been every inch a man, His great whom attended the funeral and not friendly to Jersey bulls. ings and kindle the fire and bring the water from the spring, and otherwise demean yourself as a good husband?

Betsey, do you love John? Do you promise to continue to love him, and to do the cooking, and his pants mended and otherwise opposition. demean yourself as a good wife should? All right, you two are married now, and you can go on

At the time of the building of the new court house, there was quite an anti-court house senti- all. ment upon the part of some of the tax payers of the county, An order had been made for the building, but it was drawn in somewhat vague terms and lawyer had been employed by some of the "antis" to try and have the order rescinded, the parties thinking, if they could get clear of the order, they might be able to block the enterprise and prevent further action in the direction.

Quite a discussion arose before the court of claims, presided over by Judge Sallee, and towards evening, as the discussion progressed, feeling grew quite warm as is often the case when a question of taxation is involved.

Judge Sallee was the last speaker, and while he talked, he remained seated. He reviewed the action which had been taken by the court, and urged the members of the court to stand to their

promise to get up in the morn- he brought down on the desk in front of him, he exclrimed with all the vehemence he could command; "We have made an order to build a court house, and we intend to build it according to the plans as agreed upon." The members of the Fiscal court sustained him, the discussion ended keep John's socks darned and and a quietus was put upon the

Dr. Williams Passes Away.

The death of Dr. Loren E. Williams yesterday morning at 4:35 o'clock, is deeply regretted by

He was born at Montpelier, in Adair county, in 1875, the son of Rev. Z. T. Williams, and Mrs. Williams, who was a Miss Wheat, one of Adair's oldest families. His death followed a lingering illness of Bright's disease, which involved a general complication.

Twenty-one years ago he graduated from the Louisville College of Dentistry, and then came to Glasgow, where he has residof his dental practice. In 1906 he was married to Miss Minnie Depp, daughter of Mr. and Mrs. J. P. Depp, of this place, who

The city never had a native or adopted citizen more popular than Dr. Williams. For many estimable reasons he was a man Williams, of Columbia, survives, of immense popularity. Resolutions.

following Resolutions were adopted recently by the Metcalfe county Colored Teachers Institute.

We your committee on Resolutions of the Metcalfe Co., colored Teachers Institute respectfully submit the following:

Whereas, having been in the town of Edmonton for the past week, and sharing the hospitality of the citizens, therefore we turn to them our heartfelt thanks for their cordiality and respect shown us while in their midst.

Whereas, having embibed great good, and rendered enthusiasm from having been here, we resolve, to return our several districts, with renewed vigor, to do more for the raising of the educational Standard of the colored Schools and Youths of Metcalfe

Be it resolved that we return a vote of thanks to Mrs. A. E Murphy for the noble and efficient manner in which she did the clerical work of the Institute.

Be, it further resolved, that we turn a vote of thanks to Prof. R. Lasley for the high and efficient manner in which he instructed this Institute.

Be it still further resolved. that we extend a vote of thanks

Respectfully Submitted. R. B. Smith Chir. Miss Ora Wood, Miss Emma Clark.

Sensations of an Airplane Man Detailed as to Thrills Experienced at Dizzy Height

The trials for my military brevet were for the most interesting thing I have done in aviation. On finishing the 60-horse power Bleriot class, I was told that I would have to do my brevet work on a small Cauldron biplane, as Wordhoff in Atlantic Monthly.

POULTRY KEEPING IN BACK YARDS

Quantuninininininininininininini Poultry keeping, although a comparatively simple undertaking, will be successful in direct proportion to the study and labor which are expended good material on the subject, but Backyard Poultry Keeping (Farmers' tions needed to make a start. It tells how to overcome the objections to keeping poultry in the city, what kinds Old 2887 is a bully bus. I was off of fowls to keep, the size of the flock same, directions as to feeding the matters essential to the success of the undertaking. Another helpful bulletin of a general character is Hints to Poultry Raisers (Farmers' Bulletin 528). This gives a great deal of useful and authoritative information within very small compass.

47.500.000 Acres of Wheat Should Be Sown This Fall For 1919 Liberty Harvest

A great liberty wheat harvest in 1919 is asked of American farmers in a national growing program issued by Secretary Houston after full consideration of the increasing needs for this essential food at home and in the allied nations.

Not less than 45,000,000 acres of winter wheat is called for in this fall's sowing and Secretary Houston suggests that approximately 47,500,000 acres could be sown if conditions are especially favorable. The larger acreage, it was pointed out, would better meet the estimated needs of the allied nations and the population at

From the minimum acreage called for, which is only about the average of the five years 1913-17, it is estimated 636,000,000 bushels of winter wheat might be expected; from the suggested larger acreage, approximately 667,000-000 bushels should be harvested. These production estimates are based upon an average yield of 15.7 bushels an acre and an abandonment of 10 per cent in the area sown on account of winter kill.

Mother's Cook Book

The grandest of heroic deeds are those is riches; to be able to do without, that

is power.-George McDonald. Food for the Family.

Skim milk may be used in countless

dishes where whole milk was formerly

Milk Soups.

considered indispensable.

Take one quart of skim milk, onefourth of a cupful of meat fat or oleomargarine, one-fourth of a cupful of flour, two teaspoonfuls of salt. Melt the fat and stir it into the flour; when well mixed add the cold milk and cook until the flour is well cooked, stirring constantly. This thickened milk may be used as a foundation for any cream soup. Add two cupfuls of corn, peas, beans, or potato pulp. In using tomato, add a fourth of a teaspoonful of soda. One-half cupful of grated cheese or the same amount of peanut butter will make cheese or pea-

Peanut Loaf.

Take one cupful of toasted bread crumbs, three-fourths of a cupful of peanut butter, one-half of a cupful of rice, one teaspoonful of salt, a speck of pepper, and a teaspoonful of poultry dressing, with a tablespoonful of chopped parsley. Combine, make in a loaf and bake thirty minutes; unmold and serve with tomato catsup.

Nut and Cheese Loaf.

Nuts like legumes are rich in fat and protein. To aid in digestion they should be ground or chopped. Take one cupful of grated cheese, one cupful of walnut meats or hickory nut meats, one cupful of bread crumbs, two tablespoonfuls of water, one teaspoonful of salt, two tablespoonfuls of onion and a few dashes of pepper. Cook the onion in a tablespoonful of oil and water until tender, add the other ingredients and bake in a loaf until brown. Garnish with lemon points.

Nut Muffins,

Take one and a half cupfuls of whole wheat flour, one-half teaspoonful of soda, the same of salt, a half cupful each of molasses and sour milk, one egg and a half cupful of nuts. Mix the dry ingredients, and the ground nuts, add other ingredients, stirring enough to mix and put into greased muffin pans. Bake thirty minutes in a moderate oven.

Nut, Cheese, Date Salad. Stuff eighteen dates with seasoned cream cheese. Roll in chopped nuts. Arrange three on a salad plate with a pile of mayonnaise in the center.

Tellie Maxwell the ones back home. Well, that

From Camp Meade, Md.

Dear Editor:-

Let me give the readers of the News a hint of what we boys of the Machine Gun Co., has to do. Nothing much, just get up at there were no Bleriots available, writes upon it. There is an abundance of five thirty in the morning, stand reveille, and one platoon, (1 of the company) goes to the stable, water and feed the mules and horses, while the remainder of the company goes through a series of physical exercises. This makes us relish our "slum" the bath-house washing for breakfast. After the craving appetites have been satisfied, and scrambled eggs no longer taste good, our plate, cup, knife, fork and spoon are stacked on tables, then soon each man will be found preparing his bunk, and the floor beneath it for morning inspection. thing that resembles a match, stem, paper, cigarette, or tobac co must be polished up in and around quarters. After this, the men go to the stables again, take every horse and mule out, and here is the fun. "Grooming them." Lets not forget that everything here is done systematically. There are two ways to groom the stock. One is the right way and the other is the wrong way, and after about one correction we prefer the right way. Here it is: Each man leads his animal into the correll, ties it to the fence, and takes his stand two paces directly to the rear of the animal. This being a nerve racking position to some, knowing how easy it is for the southern extremities of some mules to come in contact with a man's "chow basket," they are not seen standing there very long. A signal from the commanders whistle places every man to the left of the animal in his charge, At the command, commence grooming, every man falls in on the animals left front foot, here he toils until the next command is given, which is,

> an hour on the rear feet. Next comes bridling and saddling of the animals. This, too, is done in a certain way, which I'll not take time to discuss just now, but when this is done, we know that exercising the animals is next on program. After they have come to the end of a six or eight mile hike, some of them declare it is also pretty stiff exercise for man as well as beast, especially those whose mules can not be ridden. They just have to cling to the end of the halter shank with one hand and mop sweat with the other. After the hike is finished we just drill in company formation or by platoons or sectors or squads unti

"face and left neck" then the
